

SAP performance monitoring & management solved

Does your team waste time on SAP daily checks just to verify that nothing is wrong instead of focusing on solving what's not working?

Does troubleshooting take you a long time due to incomplete data and data that is hard to find?

Do you waste a lot of time building SAP service level and performance reports?

Do you want to prevent SAP problems before they happen?

Are you sure you catch all SAP security change breaches?

syslink Xandria is your solution. Xandria is a reliable and scalable SAP performance monitoring & management solution. Xandria provides predictive and proactive monitoring, as-well-as automated best-practices system monitoring.

The product is easy and fast to install and doesn't require consulting or an implementation project. **Xandria - Built by SAP Basis engineers for Basis engineers.**

Main Xandria features

- Real-time monitoring
- Daily out-of-the-box (native) and custom checks
- Reporting and trending
- Performance monitoring and predictive analysis
- Predictive resource planning
- Configuration change tracking for audit and security
- Complete SAP landscape visibility

Benefits

Automated Daily and Real-time Monitoring - saving at least 20% of weekly hours

Actionable monitoring - prevent SAP failures before they happen. Plan for your resources growth in advance

Clear visibility of SAP landscape to simplify operations

Shorten time to prepare and pass audits and ensure system security

Smart monitoring, notifications, and reporting

Xandria's Capabilities

Out-of-the-box SAP landscape, process, instances, databases, servers, and 3rd party apps checks, with easily customizable checks and notifications.

Predictive resource analysis and forecasting provide indications of expected resource growth. Get notified before issues spiral.

Customizable dashboards and cross-server landscape visibility to ensure version consistency across all environments.

Track and report any change and security configuration change. Notify in case of breach of policy.

Get only notifications that matter when combined elements cross a threshold. Focus and report only on the important issues.

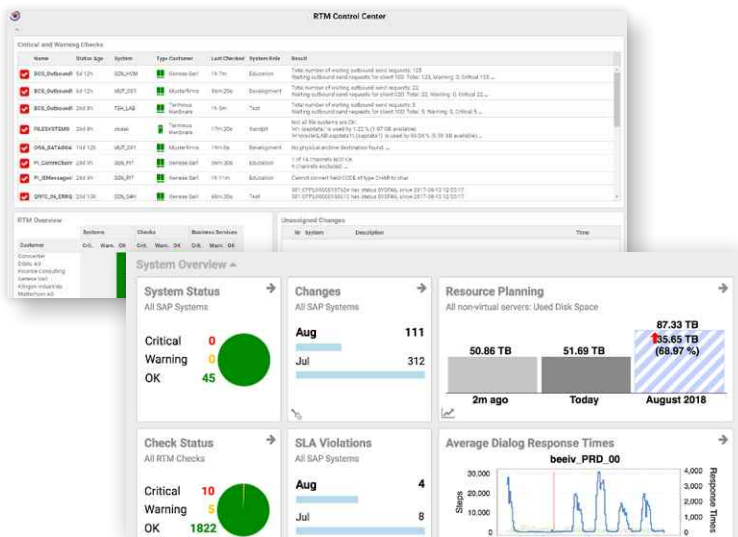

Monitored Systems

SAP Basis

- SAP Basis releases starting from 4.6C to 7.5, as well as BI, XI, TREX, Web Dispatcher and HANA

Databases (stand-alone & SAP instances)

- SAP HANA 1.0, 2.0
- SAP Sybase ASE versions 15.7 and higher
- SAP SQL Anywhere 16 and higher
- IBM DB2 Universal Database 8.2.2 and higher
- Oracle8i, Oracle9i, Oracle10g, Oracle11g, Oracle12c
- MaxDB 7.5 and higher
- Microsoft SQL Server 2000, Microsoft SQL Server 2005, Microsoft SQL Server 2008, Microsoft SQL Server 2008 R2, Microsoft SQL Server 2012, Microsoft SQL Server 2014 (on Microsoft Windows operating systems)
- Sybase ASE versions 15.7 and higher

Xandria Footprint

Xandria Central Master Integrations

Operating systems

- Microsoft Windows® server 2008/2008 R2, 2012/2012 R2
- All major Linux distributions on Intel x86_64 architecture with GNU C Library 2.7 or higher
- IBM AIX 6 and higher

Master's database

- Microsoft SQL Server 2008, Microsoft SQL Server 2008 R2, Microsoft SQL Server 2012, and Microsoft SQL Server 2014 (US English Language Version) on Microsoft Windows operating systems:
 - For up to 80 managed systems the Microsoft SQL Server 2014 Express Edition shipped together with syslink Xandria will suffice
 - For more than 80 managed systems we recommend to use Microsoft SQL Server 2012 or Microsoft SQL Server 2014 Standard Edition
- PostgreSQL 8.4.7 64-bit (on IBM AIX and Linux operating systems)

Xandria Agents Integrations

Microsoft Windows® Server

- 2003
- 2008/2008 R2 (x86, x86_64, Itanium 2)
- 2012/2012 R2

Linux (x86 and ppc64)

- Novell SUSE Linux Enterprise Server 9 and higher
- RedHat® Enterprise Server 3 and higher on Intel x86, x86_64 and PowerPC (ppc64) architecture¹.

IBM® AIX v5.3 or higher

HP®-UX 11i

Oracle® Solaris

- Sun Solaris 8
- Solaris 9 (SPARC architecture)
- Oracle Solaris 10 (SPARC and x86_64 architecture).

Syslink and its flagship product Xandria, help companies streamline SAP enterprise monitoring and management by reducing failures, simplifying everyday operations, automating, and leveraging predictive analysis to increase service availability. Founded in 2000 and headquartered in Basel, Switzerland, Syslink has been an SAP certified partner since its inception. Xandria's intuitive solution provides SAP system management, monitoring, and analysis solution offering 24/7 real-time visibility for SAP systems - on-premise, cloud, or HANA based. The product's simple installation gets customers up and running in hours instead of months. Syslink Xandria merges 20 years of SAP management experience into the best-in-class solution that takes SAP management to new levels. Visit <http://www.Syslinkams.com> to learn more.
